Virtual Seminar

**About Feed the Future  
Advancing Local Leadership,  
Innovation and Networks  
(ALL-IN)**

Feed the Future ALL-IN flips the traditional model of research collaborations led from US universities. Researchers at African institutions lead ALL-IN collaborations, leveraging their local knowledge, skills and ideas to build evidence that promotes resilience and empowers rural communities to share in inclusive agricultural growth. ALL-IN was established by USAID as a partnership between the Feed the Future MRR Innovation Lab at the University of California, Davis and the International Centre for Evaluation and Development (ICED) in Nairobi, Kenya.

# IMPACTFUL IMPACT EVALUATIONS

**Rigorous impact evaluations (IEs) can provide critical evidence and knowledge about the contribution of innovations and technologies to agricultural sector development. Yet this powerful tool remains underutilized, particularly in publicly funded programs.**

Tegemeo Institute of Egerton University will host this seminar as a precursor to an IE training to be held in November, 2021. The presentations will provide concrete examples of how impact evaluations have informed decisions on program design and resulted to greater impacts and cost-effectiveness (greater value for development funds).

Presenters will also provide tips on how to use impact evaluations to answer pertinent questions about the impact of interventions and their ability to reach the intended actors, and how to effectively convey project benefits to policy makers.

The speakers include: Prof Bradford Mills of Virginia Tech University, USA; PIs of FtF ALL-IN project on Impact of Digital Agro-Weather Advisories on Pastoral and Farming Communities in Kenya, Drs Mercy Kamau and Lilian Kirimi of Tegemeo Institute, Egerton University, Kenya.

For event RSVP/questions, contact Mercy Kamau:
